The area under hay has decreased in Leinster and Munster, and increased in Ulster and Connaught.

PASTURE.

The area of pasture, including mountain grazing, is returned as 12,409,074 acres in 1913, as compared with 12,411,858 acres in 1912—a decrease of 2,784 acres. When considering these figures of pasture area it should be remembered always that there are certain areas which it is difficult to classify, and which one year may be returned as "grazed" land, and another year may be returned as turf bog or barren mountain; but the grazing value of these areas is small. The important increase or decrease in pasture is best measured by the extent to which the area of crops and of hay has decreased or increased, for in such a statistical inquiry as is being dealt with here the extent of the area under crops can be more exactly determined than the area of grazing land.

SCUTCHING MILLS.

In connection with the area under flax, I beg to state that the number of Scutching Mills enumerated as working in 1913 is as follows:—In the province of Ulster, 634; Munster, 8; Connaught, 2; and Leinster, 1; making a total of 645 for Ireland.

The members of the Royal Irish Constabulary and the Metropolitan Police, who acted as Enumerators, rendered valuable assistance in carrying through the work of inquiry and enumeration in the several districts.

I have the honour to be,

Sir,

Your obedient Servant,

THOMAS BUTLER,
*Superintendent of Statistics
and Intelligence Branch.*
